

CELLFOOD essential detox

Accolades for Cellfood from award winning author
Michelle Schoffro Cook, DNM, DAC, CNC, CITP:

“**Cellfood** is readily absorbed at the cellular level, making a wealth of nutrients available to the body for optimum healing.

Unlike the other oxygen products I've tried, Cellfood delivers the oxygen slowly, thereby preventing free radical damage. And, unlike many other oxygen products, Cellfood provides the valuable nutrients, oxygen and enzymes needed for healthy detoxification. Cellfood actually speeds detoxification, particularly of the blood, lymphatic system, and kidneys.

Cellfood also helps normalize pH—which is integral to proper detoxification and healing. It assists with energy, boosts the immune system and aids water absorption at cellular levels, thereby preventing free radical damage.”

Cellfood is also a critical part of Dr. Shoffro Cook’s ‘The 4-Week Ultimate Body Detox Plan’:

Cellfood is the **only** brand named product in this award-winning book.

Dr. Schoffro Cook says Cellfood is “**essential throughout the program,**” listing it first and foremost among the “4 Week Detox Program” requirements. The doctor’s plan also lists Cellfood as part of a targeted program to cleanse **the blood, circulatory system, lungs, respiratory tract & skin.**
