

Why our Cellfood® Silica Formula is the best:

Silica comes in many forms and from many sources. Most silica products on the market today are in tablet form and are not as easily absorbed by the body. Cellfood® Essential Silica Formula starts with highly purified mineral silica. Then, through a unique proprietary process, it's transformed to create a pH neutral, ionic molecule that is extremely small - measuring less than 10 nanometers. At this size and ionic configuration the elemental atoms remain in perpetual suspension, and aren't bound to any ligands, proteins, or citrates. The only carrier is pure, healthful water. We then combine this solution with the remarkable Cellfood® formula thus providing a unique nutritional delivery, system into every cell of the body. And Cellfood® contains 129 trace elements, including boron, calcium, magnesium, potassium, and ascorbic acid - all vital minerals that work in synergy with silica. **The result is an extremely pure, easy-to-absorb, pleasant-tasting, complete and all natural silica formulation.**

Remember: Cellfood® Essential Silica Formula does **not** replace your daily intake of the original Cellfood® dietary supplement - but rather adds powerful anti-aging nutrition to your overall health and wellness program.

Serving Suggestion: Shake bottle gently. Add 30 drops once daily or add 15 drops twice daily to 200mls of water or juice. May also be used after strenuous physical activity. No refrigeration required.

Ingredients: Contains pure Silica and Cellfood® (a proprietary ionic blend of 78 minerals, 34 plant sourced enzymes, 17 plant sourced amino acids, electrolytes and dissolved oxygen).

From the makers of CELLFOOD®

CELLFOOD® Super Concentrate is a uniquely created, proprietary formulation that contains 78 ionic minerals, 34 enzymes, 17 amino acids, electrolytes and dissolved oxygen – and utilises a unique water-splitting technology. Cellfood provides an unsurpassed oxygen and nutrient delivery system that may be absorbed quickly and efficiently by every cell in the body. Cellfood is rich in beneficial antioxidants, is highly alkalisng and completely safe.

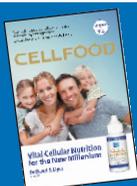

CELLFOOD® Oxygen Gel is a nutrient rich, topical application from the original CELLFOOD® concentrate formula, which helps provide healthy skin an active layer of oxygenated moisture and protection, whilst decreasing the appearance of fine lines around the eyes and mouth. CELLFOOD® Oxygen Gel also helps to nurture damaged skin by revitalizing and rejuvenating the epidermal layer. Chemical and Paraben free.

CELLFOOD® Natural Burn Formula is a safe and effective way to help you lose weight, without the use of dangerous stimulants. The proprietary formula combines Cellfood® with the fat burner; L-Carnitine, and the appetite suppressant; Garcinia Cambogia. The balanced, but powerful combination, when used in conjunction with a sensible exercise program, may help you to lose weight – even while you sleep.

Beyond Silica

CELLFOOD® ESSENTIAL SILICA FORMULA

Designed to provide foundational support for:

- bones, joints and muscles
- connective tissue
- hair, skin, teeth, gums & heart
- powerful anti-aging

Each serving contains original Cellfood® for optimum ease of absorption at the cellular level plus 500mg of colloidal silica.

CELLFOOD® is the world's #1 selling oxygen + nutrient formula

THE ORIGINAL SINCE 1969

Our bodies need silica.

In our youth, our tissues absorb and maintain high levels of silica enabling our bodies to remain flexible, resilient, and energetic - but as we age, our silica levels steadily decline. Silica supplementation can be an aid in supporting healthy bones, joints and cartilage, skin, nails, hair, teeth, gums and heart.

It's believed that silica supplementation may be a key factor in helping us maintain a healthier, more youthful, and pain-free body - and in reducing the body's natural recovery time.

• **Silica and the bones + joints:** Calcium and Vitamin D alone are not sufficient for bone growth, density, strength, and flexibility. Silica, along with other trace minerals found in this formula, may be used to strengthen bones and increase the body's collagen production.

Cellfood® Essential Silica Formula contains easy-to-absorb silica plus all the needed additional trace minerals.

• **Silica and the skin, hair, nails, teeth + gums:** Research shows that without adequate levels of silica, the body cannot maintain optimum skin elasticity, strong hair, nails, teeth and gums.

• **Silica and the heart:** Research confirms that with age, silica disappears from the aorta, the heart's key blood vessel - thus weakening its critical connective tissue, and resulting in a greater cardiac risk.

• **Silica and the brain:** Silica levels decrease with aging and therefore may be needed in larger amounts by the elderly. Research shows that silica counteracts the effects of aluminum on the body and therefore may be important in supporting neurological health.

Cellfood® Essential Silica

may help support these bodily functions:

- Bone strength and joint flexibility
- Improved skin moisture and elasticity
- Stimulation of cell formation and metabolism
- Slowing of the aging process
- Protection and support for connective tissue
- Enhanced collagen formation
- Immune system
- Digestion
- Increased elasticity of blood vessels
- Re-mineralization of skeletal system
- Hair, skin, teeth, gums and heart
- Harmonizes biological age with physical age

Our bodies need boron, magnesium, manganese, potassium, iron and phosphorous in order to assimilate the silica in our system. **Cellfood® Essential Silica Formula** contains ALL these elements, and all from natural plant sources.*

* All Cellfood formulations are completely free of synthetic additives, chemicals or anything artificial.
